Doug's Plugs Order Form

Print this form on your computer using regular printer/copier paper. Place the paper over the Bass side f-hole and rub across the f-hole opening with the side of a #2 pencil (Make sure you don't move the paper). As you scribble across it you should see a line where the pencil bumps against the edge of the f-hole. Do this all the way around until you have a line or image. There is no need to darken the line as I need to see the actual line to make the proper template.

Name _____

Address _____
